

Project Workflow Summary

Step 1: Learning Journey

Attended live technical sessions, followed the day-wise schedule, joined mentor discussions, and used session recordings for revision.

Step 2: Courses

Completed the mandatory self-learning courses and marked modules as complete.

Step 3: Group Project

Worked as part of the assigned team, coordinated tasks, and contributed to project development.

Step 4: Project Workspace

Developed the capstone project, maintained deliverables, uploaded code and files to GitHub, and prepared a demo video.

Step 5: Kanban Board

Updated task status from To Do → In Progress → Review to track progress.

Step 6: Deliverables

Submitted code, dataset, results, references, GitHub repository, demo video, and completed project report.

Step 7: Grand Assessment

Completed the technical assessment after training and project work.

Step 8: Evaluation & Certification

Project evaluated by mentors; certificate awarded after successful completion of all requirements.
